

LAYING THE FOUNDATIONS FOR PEACE

NUCLEAR WEAPONS ARE NOT JUST A NASTY MISTAKE —
BUT THE LOGICAL RESULT OF THE SOCIETY WE HAVE CREATED

GRASS-ROOTS DEMOCRACY

People don't declare war — governments do. In our society more and more people find themselves unable to take control of their own lives by their own efforts.

MAKE PEACE NOT WAR

Militarism has deep roots in our society. Arms trading, war films, war toys, military parades all glorify war. War never was, and never will be glorious.

NONVIOLENCE

Our society fosters isolation and confrontation. To see the inseparable connection between ourselves and others is to understand nonviolence as the essence of lasting peace.

SUSTAINABLE ECONOMY

Ever-increasing consumption is simply not possible on a planet with strictly finite resources. International competition for raw materials and markets, as nations try to expand and industrialise, leads inevitably to shortages, disputes and armed conflict.

TECHNOLOGY FOR PEOPLE

Our obsession with technical progress is out of control. Technology is abused for military purposes and weapons. It could serve rather than enslave humanity.

FEMININE-MASCULINE

Rejection of the feminine has created an aggressive, competitive society. A healthy society will be one that redresses the balance between the feminine and the masculine and achieves a sense of wholeness.

HARMONY

Real security and sustainability depends upon our ecological balance with the rest of creation. As the dominant species, it is our moral responsibility to act as stewards to the planet and to all species on it.
