election communication

Dear Elector,

Like so many other people I did not vote at the last General Election and I would not vote at this one unless someone who thinks like me was standing. As your Ecology Party candidate, and there are over 50 of us throughout the Country, there is one thing I can claim with confidence. I and the Ecology Party see things very differently from the other parties and their candidates. Because we are so different it is worth finding out more about us. Ours could be the only radio and television broadcasts worth listening to and watching.

If you are as disillusioned with existing politics and politicians as I am then think about this –

**IF EVERYBODY IN THIS CONSTITUENCY WHO LIKE ME WOULD NOT OTHERWISE BOTHER TO VOTE WERE TO VOTE FOR ME THEN – WE WOULD WIN!**

Another thing I can claim with confidence. As from the day the first Ecology Party candidate is elected to Parliament, politics in Britain will undergo a complete change. I believe it will be a change for the better. It could hardly be otherwise.

Yours sincerely,

*TONY WHITTAKER is 46, has an Honours degree in Law, is a retired Solicitor, has a smallholding and is married. He is Vice Chairman of East Anstey Parish Meeting, Secretary of East Anstey Parochial Church Council and an active member of the Dulverton Players.*

Tony Whittaker.

## the ecology party is —

a political party whose policies are based on the principle that mankind must learn to live in harmony with Nature within the limitations of the Earth's finite supply of resources.

Continued industrial expansion, requiring unlimited consumption of raw materials, is not sustainable and its termination on a universal scale is likely within the lifetime of someone alive today. The choice is stark, Do we let this happen through a succession of economic collapses, famines, wars and social and political crises, or do we start now to plan a series of changes which will lead society towards a humane, indefinitely sustainable way of life? The choice is ours.

A growing number of people, aware of this choice, are disillusioned and frustrated in their desire to begin the transition to a sustainable society by the short-sighted, inept actions of government and the traditional opposition.

The Ecology Party was formed to show that there is a democratic political method of achieving an ecologically acceptable, sustainable and more satisfying way of life.

Associated parties are in existence throughout Europe and in many other parts of the World.

WE DO NOT INHERIT THE EARTH FROM OUR FATHERS  
WE BORROW IT FROM OUR CHILDREN
